DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 14-17, drawn to method of analyzing a papermaking process.

Group II, claim(s) 18-26, drawn to an electrochemical sensor.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of group I is the combination of an electrochemical and odor measurement for analysis of a papermaking process. The special technical feature of group II is a measurement cell through which a liquid is led to a plurality of working electrodes of different metals and reference and counter electrodes. These special technical features are not required for the other respective groups.

3. A telephone call was made to Christopher Fildes on 9-1-2004 to request an oral election to the above restriction requirement, but a written restriction requirement was requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
